COLOR MATERIALS

The Charisma Of Bronze

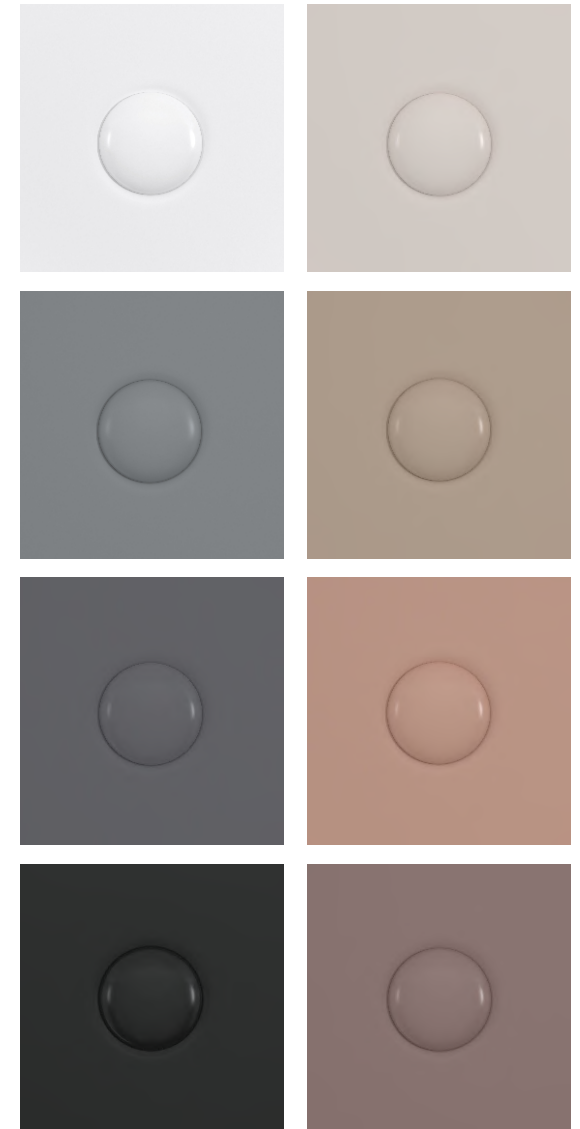

After spray painting, the bronze surface appears glamorous golden, silver and so on.

COLOR MATERIALS

A Flourishing Ceramic Age

The fusion of glossy ceramic surfaces and diversified colors creates a perfect time.

POP-UP WASTE

After being endowed with a painted surface, the bronze pop-up waste has formed a consistent match with the faucet. The entire series interprets the rigor and harmony of color combination. As an accessory, the role of the pop-up waste has become one of the highlights of the washing space.

SIPHON

The siphon is hidden under the basin, whereas it exudes delicate charm to all. The unique metallic luster echoes the faucet above, dotting with the bathroom space. As an intermediary connecting the wall and the sink, its functionality is doubtless.

SQUEEGEE

The existence of squeegee subverts cognition. It will never take you into a fuzzy world. Visibility and transparency are the only explanation for it. The ergonomic handle design effectively avoids slipping during use. Make-up mirrors, desktops, glass doors, etc., are workplaces where squeegee proves its value.

ASSEMBLY

Assembly embodies perfect consistency and harmony. The same material and the same color are the two most basic elements. The collection is the desired appearance of the bathroom. After a round of competitive expression, the connotation of assembly is humility and moderation.

TOWEL RAIL

The slender towel rail is absolutely indispensable in the bathroom. The trendy black and gold are frequent visitors to the washing space. The metal texture does not appear obtrusive or blind, yet on the contrary, it is fully deluxe beside the basin. The straight lines demonstrate the philosophy of minimalism.
